foreword

Any effective working relationship in decision-making between the public and professional educators must be based on common possession of the facts. This annual publication of the State Department of Education is designed to place the basic facts about public education in summary form before the widest possible audience.

This year too we have placed before the public our first accountability report, the most comprehensive compilation about the schools we have ever undertaken. A copy of the detailed report, some 600 pages long, has been deposited for reference in every public school and public library in the State. A summary of that document is also available to anyone who requests a copy.

Citizens who want to have their views considered seriously must pay their dues: they must know the facts. With *Facts About Maryland Public Education, The Maryland Accountability Program Report,* and other publications, we are attempting to supply those facts.
